

Mobius® Chrom Systems

For Purification of Clinical and Process Scale Biologics

The Mobius® Chrom systems are flexible, automated, single-chromatography systems that enable consistent and reliable separation and purification of mAbs, vaccines, plasma, and therapeutic proteins at clinical and process scale.

The innovative single-use flowpath reduces contamination risk and gives you the confidence to tackle any chromatography challenge, while the flexible design featuring a standard hardware platform that can be combined with a selection of options, empowers you to meet your unique process requirements.

The systems deliver optimal operational flexibility for processes from 50 to 2,000 L with flow rates from 0.1 to 20 L/min, a 5:1 turn down ratio at process scale and enhanced isocratic and linear gradient accuracy. The single-use flow path offers the flexibility to operate in functionally or fully closed mode.

Benefits

- Manufacturing flexibility
- Safe and reliable process
- Fully automated & user friendly
- Enables high resolution separation

Mobius® Chrom 2

0.1–2.2 L/min

Mobius® Chrom 10

Available soon

1.6–10 L/min

Mobius® Chrom 20

4–20 L/min

Benefits

Manufacturing Flexibility

- One family of chromatography systems with harmonized design and linear performance ensures successful and seamless scale-up or scale-down.
- The design of the single-use systems is focused on flexibility, reducing preparation, process time and labour.
- Adapts to mutli-products and multi-processing modes (open and closed modes of operation is possible with specifically designed flow path, allowing to reduce contamination risk).
- To optimize facility utilization and footprint, an in-line dilution option is available for the Mobius® Chrom 20 system.

Safe and reliable process

The systems and flow paths are extremely robust and GMP compliant. Superior performances, support & services will meet your expectations to implement and process purifications steps with peace of mind.

Fully automated & user friendly

- Full automation with step edition CCP software.
- Mobius® Chrom systems designed with operator comfort and safety in mind and features a movable screen for operator convenience.
- The stainless-steel surface is easy to clean and the accessible components facilitate maintenance.
- Easy installation of the flowpaths with unique clamshell design.

Enables high resolution separation

The high gradient accuracy of the system enhances separation performance making it ideal for challenging processes.

System Components

The Mobius® Chrom systems are made up of a base system and configurable options that can be added to design a system that best meets your purification process and challenges.

The base cart is the heart of the system and houses the clamshell and automation software.

Mobius® Chrom Systems Configurations

The basic configuration includes:

- Clamshell
- Pump cart
- Base cart
- Post-column instrumentation

The system options and accessories include:

For Mobius® Chrom 20 system only

Pre-column 0.2 µm filter and its support for protecting the column

Ultrasonic flowmeter enabling in-line dilution

Pre-column instrumentation for conductivity and pH measurement

Bubble trap vent

Mobius® Chrom Systems standard offering and options

Mobius® Chrom 2

Mobius® Chrom 10

Mobius® Chrom 20 (in-line dilution optional)

Base cart + Bubble trap + Pump cart + Clamshell

Magnetic flowmeter

Ultrasonic flowmeter

Single-Use post column instrumentation: conductivity/UV

254/280 nm

280/300 nm

pH probes*

Single-Use (pre-installed)

Multi-Use (self installed)

Standard offering

Options

Mobius® Chrom Systems Flexware® Assemblies

Single-use Flexware® assemblies deliver equivalent performance to that of traditional stainless-steel systems, while providing maximized contamination control.

Assemblies minimize dead space, decreasing the risk of contamination to virtually zero, while ensuring high gradient accuracy. The assemblies are delivered gamma-irradiated, ready-to-use, and are clearly labeled, significantly reducing the risk of installation error and the challenges typically associated with installing single-use flow paths.

Benefits of our 100% Single-use Flowpaths

- Fast changeover and reduced contamination risk from previous batches in multi-product and multi-scale productions.
- Combination of clamshell and Flexware® clamshell assembly offers easy installation compared to classic tubing.
- Reduced hold-up volume contributes to the enhanced accuracy of the system.
- Reduced number of connections versus traditional single-use assemblies decreases the risk of integrity failure.
- The clamshell assemblies are 100% integrity tested during manufacturing, ensuring reliable performance.

Closed and open modes

All modes of operation are enabled with specifically designed flow path, allowing to reduce contamination risk and protect operators. The switch between modes of operation is straightforward.

Flexware® clamshell assembly labels.

Related products to support your chromatography process

QuikScale® Chromatography Columns

Designed to achieve maximized throughput, our QuikScale® columns are easily packed to deliver optimal resolution across a wide range of chromatographic applications, accommodating all media types. The flow distributor assures full, uniform media utilization within the column, assuring reproducible and reliable separations. QuikScale® chromatography columns offer fast packing and unpacking, predictable and scalable performances, and flow adjuster seal technology for fail-safe operation in a choice of column tube materials for any application.

IsoPak™ Chromatography Process Columns

Recognized for their proven chromatographic performance, IsoPak™ columns provide faster, cleaner, and more consistent packing and unpacking for reproducible results. IsoPak™ columns are available in a variety of options including IsoPak™ valves, antijet, hydraulic assist, and proven flow cell distribution to provide consistent performance and scalability across a wide range of column diameters.

Industry-Leading Affinity and Ion Exchange Chromatography Medias

Eshmuno® Resin

This unique family of ion-exchange and affinity resins is specifically designed for highly productive downstream purification.

Fractogel® Resin

This tentacle-modified synthetic polymer resin is designed for ion exchange, hydrophobic interaction, size exclusion and metal chelate affinity.

Supply Robustness and Control. Stay Ahead.

Mega-trends are contributing to a boom in the biopharmaceutical industry. As a leading partner and supplier to the industry, we continue to strengthen our supply chain to support our commitment of on-time delivery reliability and product quality to help you stay ahead.

To learn more about our program, please visit our website at [MerckMillipore.com/StayAhead](https://www.MerckMillipore.com/StayAhead)

Mobius® Chrom Systems Services

The pharmaceutical and biotechnology industries are highly regulated and, to help you navigate this challenging environment, we offer a wide range of services. These services help you save time and lower costs. For your peace of mind, all our services are performed by our global experts who have an intimate knowledge of our equipment backed by decades of experience.

Qualification Services

Our qualification services are designed to make the integration of our system into your process as seamless as possible and ensure your equipment is properly installed and functioning per your pre-defined requirements.

- Factory acceptance test (FAT).
- Installation qualification/operational qualification (IQ/OQ).
- Full test package: this service is an alternative to standard IQ/OQ for customers who wish to have tests from FAT performed again at their site.
- Performance qualification support (PQ).

For additional information on tests performed, please contact us to get the detailed test matrix document MK_CA11658EN.

Training Services

Appropriate training for users is to ensure your staff has the expertise to operate and manage the system as part of your manufacturing process. Our training offering has been designed to make your staff more autonomous in managing your system and your process while saving time and money. Our training services cover system use and programming with interactive hands-on sessions and, depending on the training you select, may also include:

- Installing the Flexware® assemblies
- Interacting with the Human Machine Interface
- Manual and automatic system operation
- Troubleshooting issues
- Creating and managing your own recipes
- Process recommendations

These trainings can be delivered either at your site or in our M Lab™ Collaboration Centers. Please contact your local representative or email ilearn@merckgroup.com to discuss our training offering.

System Service Reliance Plans

To help you ensure optimum equipment uptime while mitigating risks, we have developed a wide range of services and support that allow you to select a coverage level that best fits your needs. Our System Service Reliance Plans, a complete range of services for your systems, offer priority access while ensuring your equipment is properly maintained.

For additional details, please refer to the System Service Reliance Plans Data Sheet (MK_DS7881EN). Available at SigmaAldrich.com/services-plans

Specialized Services

CCP® Software Recipe Design

Every process is unique and, to ensure that your system is optimized to deliver the best performance, our biomanufacturing engineers will configure your process into your own CCP® software recipe. This allows your system to run fully automatic, resulting in consistency and reduced operator error.

For catalogue numbers, please refer to the ordering information at the end of the document.

Repair Services and Spare Parts

Repair Services

In the event your system experiences a problem, our worldwide engineering organization will provide on-site or repair center technical support to get you back up and running as quickly as possible.

Spare Parts

Purchasing spare parts directly from us is the only way we can guarantee that you get the right parts every time, with the same level of performance as the original. For details and ordering information, check the illustrated spare parts list (MK_CA12829EN).
