

Sf-RVN® Platform

For Improving the Safety Profile of Your Gene Therapy

The baculovirus-insect cell system is widely used for production of recombinant proteins and clinical stage AAV due to its flexibility, speed, simplicity, and productivity. With the Sf-RVN® Platform, we provide a rhabdovirus-free cell line that improves the safety

profile of your bioprocesses combined with a chemically defined medium specifically formulated to get excellent growth and productivity while adhering to evolving regulatory requirements.
