

eData Exchange

Embark on Your Digital Transformation Journey

eMERGE™ Program

Our standardized platform for the exchange of data starting with the electronic delivery of raw material quality data

The Advantages of Raw Material eData Exchange

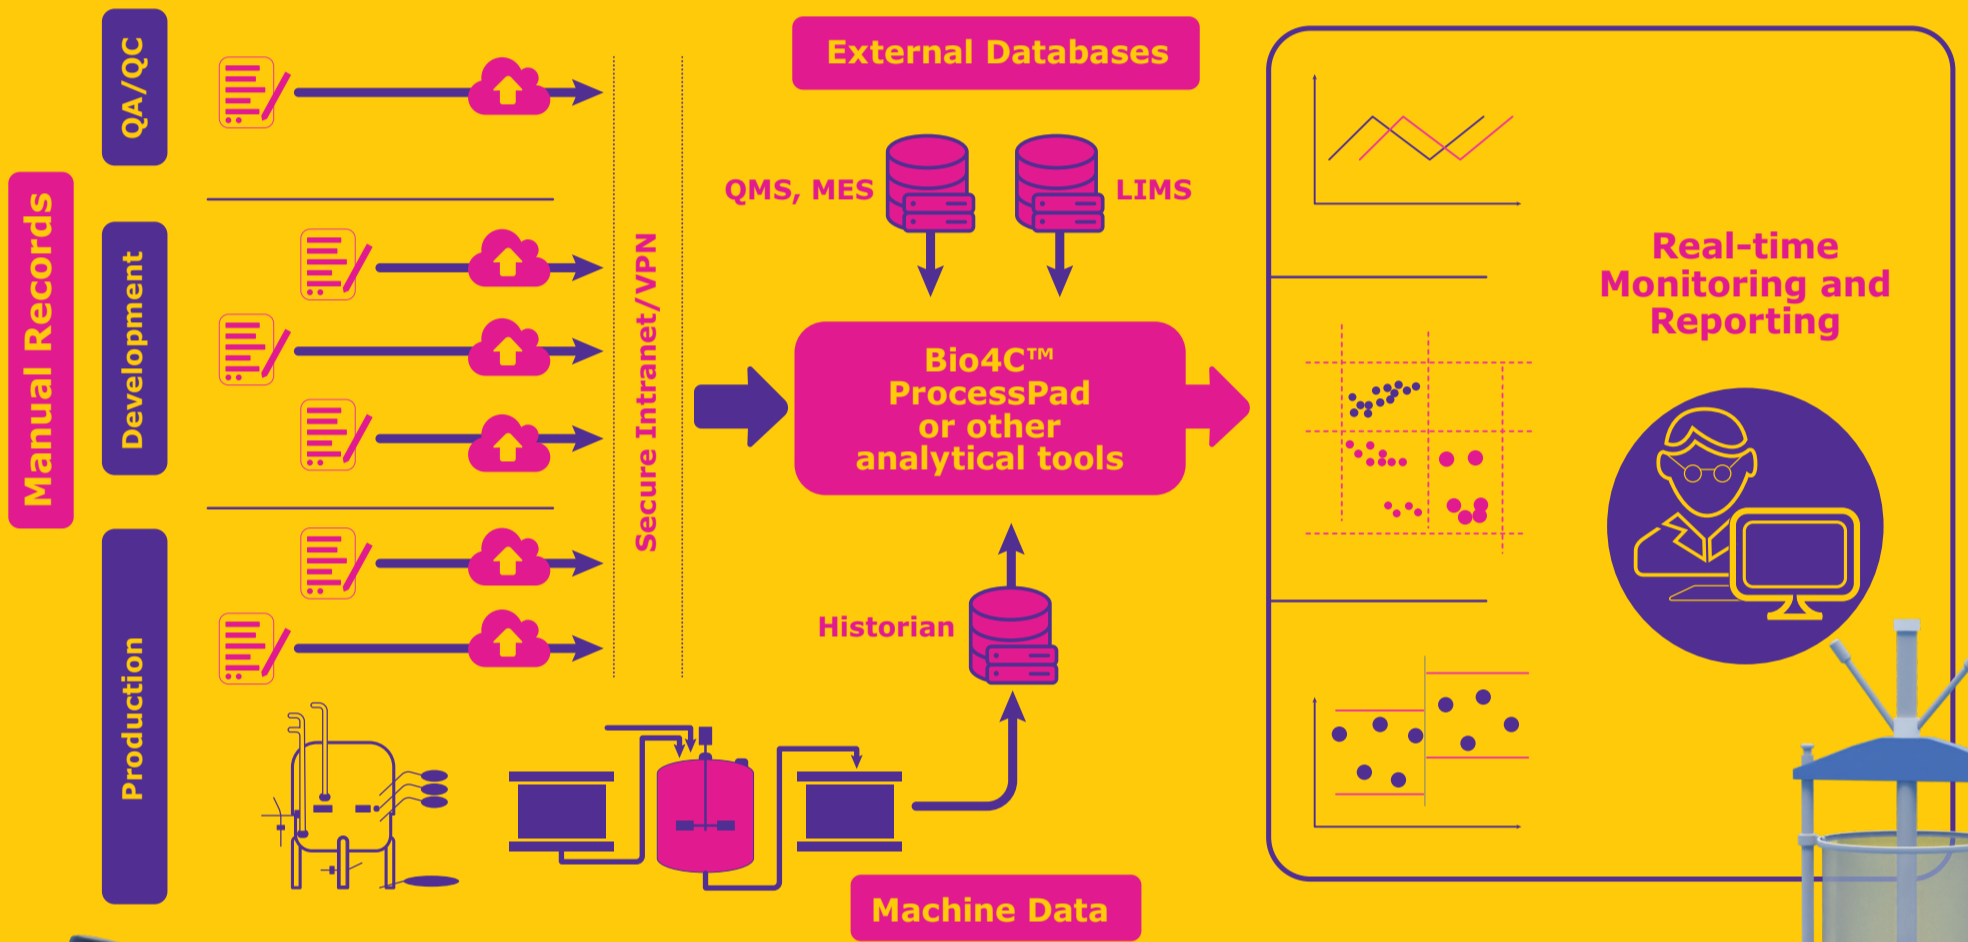

Eliminate errors & save time

Reduce process variability

Improve operational & process efficiencies

Enable next generation biologics manufacturing
Predictive analytics & advanced process monitoring and control

Compatible with your analytical data platforms including Bio4C™ ProcessPad real-time monitoring and reporting solution

***Compliant with ASTM E3077 – 17**

- Standard Guide for Raw Material eData Transfer from Material Suppliers to Pharmaceutical & Biopharmaceutical Manufacturers
- Defines standard format and data content for ease of use & implementation with:
 - Consistency of files for different product types
 - Scalable and easily maintainable system covering complete product portfolio

The eMERGE™ Program Vision

A user-friendly digital experience including analytical and logistical data, to ensure drug manufacturing predictability and control.

Getting Started with eData

- 1 Start your digital transformation journey
- 2 Build a standard platform solution for flexibility & scalability
- 3 Establish close collaboration and trust between suppliers & manufacturers
- 4 Involve multi-functional subject matter experts
- 5 Open sharing of process and application information
- 6 Achieve incremental business improvements
- 7 Work together on future technology roadmaps and expansion objectives
