

BRING EFFICIENCY TO YOUR LAB

With Limitless Automation

Tired of being stuck at the bench? Or having too many projects all coming due at once?

Automated liquid handling systems are a great option for doing sample prep and running assays so you can focus on the work you want to do while still keeping your projects on track. However, traditional assay automation options are restrictive. They require extensive time, training, and skills to properly integrate. Plus, protocols must be adjusted and adapted to fit the limitations of these automation systems. **This isn't your only option.**

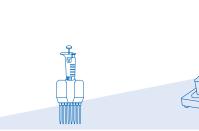

Comparing Liquid Handling Options

Entry Level

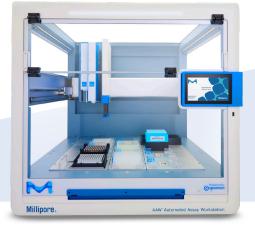

Semi-Automated

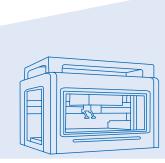

Flexible Automation

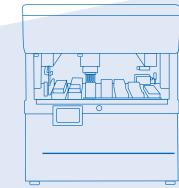

High-Throughput Integrated Automation

Cost
Complex Setup

High Hands-On Time

The AAW™ workstation is modular, making it highly flexible and user-friendly for simple workflow creation.

High Maintenance

HOW THE AAW™ WORKSTATION ADDRESSES PAIN POINTS

Beginner-friendly automation

makes it easy to incorporate in your lab

Plug-and-play

verified protocols to ensure consistency in runs and data output, reducing the need to rerun assays from human error

Maximize throughput

with walkaway automation by being able to work on other tasks while the workstation is running

On-instrument guided setup with dynamic deck maps that match your protocol

support
