

17148 Egg Yolk Emulsion

Sterile stabilized emulsion of egg yolk recommended for use in various culture media.

Composition

(100 ml per vial)

Egg Yolk 30 ml, Sterile Saline 70 ml

Directions

The bottles are to be well shaken to suspend any sediment. Aseptically add in sterile, molten culture media (cooled down to 45-50°C).

- 50 ml in 950 ml Baird Parker Agar (Cat. No 11705)
- 100 ml in 900 ml KRANEP Agar (Cat. No 60985), Cereus Selective Agar (Cat. No22310)
- 80 ml in 1 litre Anaerobic Egg Agar (17127)

Mix well and pour into sterile petri plates.
