

## 05939 RPF Supplement (Rabbit Plasma Fibrinogen Supplement)

A selective supplement for the isolation, enumeration and confirmation of *Staphylococcus aureus* from food and other specimens. Used with Baird-Parker Agar Base.

### Composition

(per vial, sufficient for 100 ml medium)

Rabbit plasma 2.5ml

Bovine Fibrinogen 0.5g

Trypsin inhibitor 2.5mg

Potassium tellurite 2.5mg

### Directions

Rehydrate the content of 1 vial aseptically with 10ml of sterile distilled water and mix well to dissolve. Avoid frothing the solution. Dissolution is not obtained immediately. Leave vial for five to ten minutes to dissolve completely. Aseptically add the vial contents to 90ml of sterile Baird Parker Agar Base (Cat. No 11705) cooled to 48°C. Mix well and use immediately.
