

Catalytic Static Mixer

Ni - Nickel

DESCRIPTION

Nickel Catalytic Static Mixer 316L 6mm dia x 150mm is a general hydrogenation/dehydrogenation catalyst that exhibits moderate activity with high selectivity. Can be used across a wide pH range.

DETAILS

Core: 3D printed 316L stainless steel

Catalyst: Ni

Mixer Shape: Cylindrical

Dimensions: 6mm diameter x 150mm length

Catalytic static mixers are a novel immobilized catalyst system, based on 3D printed mixer scaffolds containing a catalytic active layer. A variety of different active catalysts can be deposited on the metal mixer, allowing employment in many different classes of chemical reactions, such as hydrogenations, oxidations, C-C couplings and many more. Active Ni mass is ~300mg/Mixer. Mixer volume 957mm³.
